**Non-exhaustive list of numerical identifiers for the candidate list entry
“4-Nonylphenol, branched and linear, ethoxylated”**

ECHA is using a generic identifier in the candidate list specified as:

“4-Nonylphenol, branched and linear, ethoxylated [substances with a linear and/or branched alkyl chain with a carbon number of 9 covalently bound in position 4 to phenol, ethoxylated covering UVCB- and well-defined substances, polymers and homologues, which include any of the individual isomers and/or combinations thereof]”

The above relates to a group entry for which numerical identifiers have not been further specified by ECHA. To facilitate the identification of substances that fall within the scope of this entry, a non-exhaustive list of numerical identifiers has been compiled and is provided in this note. Substances or groups of substances described by the EC and CAS numbers listed below are expected fall within the scope of this entry.

Disclaimer

This inventory has been compiled to the best of our knowledge, but we do not warrant its completeness or accuracy that this does constitute a comprehensive record of all relevant numerical identifiers available. Please note that a substance identified by a numerical identifier other than those specified in this note may still be covered by this entry. Similarly, a substance for which no numerical identifier is available may also be covered by this Candidate List entry.
